For businesses, the use of artificial intelligence involves two risks:

- 1. Missed Opportunities:** Those who do not utilize AI lose significant potential for time savings and efficiency gains.
- 2. Misuse and Legal Consequences:** The careless or improper use of AI also carries legal risks - potentially resulting in substantial penalties.

This training is designed to address these two points.

What drives me

I enjoy sharing my
experience and knowledge.

Questioning, coaching,
creating, and above all,
with great enthusiasm.

When working together on a
complex topic turns into
something greater than the
sum of its parts, I am in my
element.
